

Dustbin for Bio-Degradable & Non- Bio Degradable

Waste of this type is recycled and repurposed. Compostable or biodegradable materials that can be turned into manure are what make up a green trashcan.

Wast Management, Compost, Non- Degradable, Degradable

From compost to non- degradable, managing all types of wst sustainably. Waste Management : Sorting compost, non-degradable, and degradable efficiently.

Drainage system

In order to eliminate the extra water in development, drainage systems are in place. This may include precipitation, floodwater, and many forms of runoff.
